### DETAILED ACTION

1. Claims 1-37 are pending in this office action and responsive to the preliminary amendment entered 08/06/2002.

### RESTRICTION ELECTION

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I.** Claims 1-2 electronic design using partitioning logic is classifiable in class 716 subclass 7.

**Group II.** Claims 3-37, implementing electronic design in class 716 subclass 2.

The invention group I is partitioning logic electronic design. The invention group II uses implementing electronic design without partitioning logic which is distinct from group I electronic design using partitioning logic. See M.P.E.P. § 806.05(c).

The inventions are distinct, each from the other because of the following reasons:

- a. These inventions have acquired a separate status in the art as shown by their different classification and the invention group II does not require partitioning logic as recited in the invention group I.

- b. The search required for one Group is not required for the other Groups.

For the reasons above restriction for examination purposes as indicated is proper.

The applicant is requested to cancel the claims of non-selected group.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Art Unit: 2825
